## 4" Posi-Grip™ Plastic Forceps

Same as Cat. No. 7190, but non-sterile.

**CATALOG NO. 7195**

*Bulk packed 200/carton*

## Custom Kits

## You pick the tray, we'll make it.

Don't see the tray you're looking for? Then why not custom design your own? If our standard trays cannot be adapted to your particular procedure, we'd be pleased to custom design and manufacture one to your exact specifications, with the same high quality components found in our standard kits and trays.

With a custom tray, you can also specify the sequential packing of the components for proper aseptic technique and maximum efficiency. And since all components necessary to perform the procedure are prepared for you in a single, pre-sealed,

sterile disposable tray, you can cut down on time spent ordering supplies and preparing for the procedure.

Sterile, disposable procedure trays are economical alternatives, saving your facility both time and money...not to mention the added benefit of simplified patient charges.

If you have an interest in exploring custom kit options, ask your Busse representative, or call our Customer Service Department at **(800) 645-6526**. Minimum quantities apply.

In this rapidly evolving environment of health care delivery, Busse is your prime advantage.
