

Candelis Cloud

Introducing Candelis Cloud. A cloud-hosted data repository delivering fast and secure image access to radiologists, referring physicians and patients.

- Delivers the imagery and information you need, when and where you need it, improving workflow and reducing costs
- Obsoletes the industry practice of publishing and transferring images by CD
- Easily import and share existing studies
- No proprietary lockdown -- own and control your studies

Candelis Cloud Benefits

Imaging Centers and Hospitals

- Simple access to reports and images for your referring physicians
- Archive multiple copies of studies
- Scale PACS archive to meet your requirements
- Safe, secure and 100% standards-based
- Reduce or even eliminate IT management costs
- Address HIPAA and disaster recovery requirements with a single solution
- Eliminate hardware obsolescence
- Real-time 24/7 online access to archived images and priors
- Automate communication with referring physicians
- Improve radiologist productivity and workflow
- Eliminate problematic CD/DVD publishing
- Brings specialist care to remote locations

Referring Physicians

- Notification of study and report availability
- Automatic delivery of reports and key images
- View images and reports from multiple imaging centers in a consistent manner
- Single logon
- Step-by-step status throughout imaging and treatment cycles

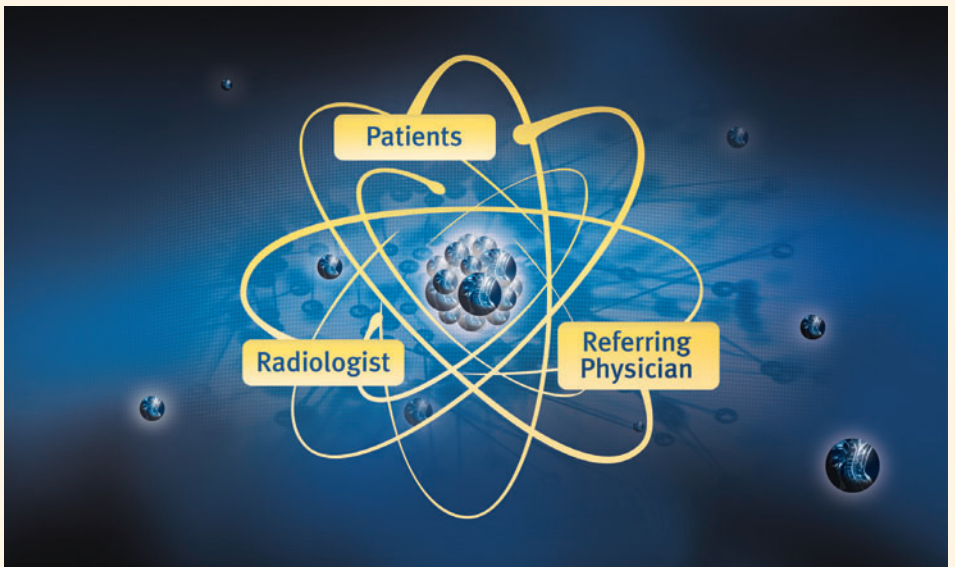

Patients

- Online access to studies
- Central, secure image repository accessible from anywhere
- Prevent unnecessary duplicate imaging procedures
- Share image and reports
- Easily obtain second opinions

Candelis Cloud

Value Advantages of Candelis Cloud

- No hardware obsolescence
- No service contract
- Unlimited storage capacity
- Universal access to information, anywhere at any time
- Ongoing availability of software updates & new features
- Increased data reliability
- Device independence via portability
- Lower workstation cost
