Invacare® Patient Sling Reference Guide

Application: Use with Invacare® 9805 and Reliant™ 450 and 600 series power or manual lifts.
 Models: 9805, RHL450-1, RPA450-1, RPL450-2, RPL600-1, RPL600-2

FULL BODY SLING

The Full Body Sling is an easy sling to use while transferring the resident from the bed to a wheelchair, toilet or shower-chair or from the floor to a bed. It offers total head and neck support and the padded lower section provides additional under-thigh comfort and support. Use the full body sling for residents who are totally dependent, partially-dependent, non-weight bearing, very heavy or have limited head control. Use this sling for amputee residents (in a reclined position). Choose from solid polyester fabric or bathing mesh, with or without commode opening. The mesh slings may be used for bathing or when the sling will be left under the resident. The solid polyester slings should not be left under the resident for extended periods because the padding retains body heat. Residents may be seated on "pressure-reduction" cushions. However, the efficacy of those cushions is diminished when solid padded slings are left under the resident.

Model	Fabric & Style	Size/Trim Colour
R110	Mesh, Full Body	Medium/Purple
R111	Mesh, Full Body	Large/Green
R112	Solid Fabric, Full Body	Medium/Purple

DIVIDED LEG WITH HEADREST

The divided leg sling is a secure, easy-to fit general purpose sling, designed for the majority of sling users. Use the divided leg sling for residents who are totally dependent, partially dependent, non-weight bearing, very heavy or have limited head control. Use this sling when transferring the resident from the bed to a wheelchair, recliner or shower-chair or from the floor to a bed.

The large opening also accommodates toileting. This versatile sling provides full head and neck support and can easily be removed or applied to a resident in a seated or supine position. The solid fabric has extra padding for residents with delicate skin. The solid polyester slings should not be left under the resident for extended periods because the padding retains body heat. Residents may be seated on "pressure-reduction" cushions. However, the efficacy of those cushions is diminished when solid padded slings are left under the resident.

Model	Fabric & Style	Size/Trim Colour
R100	Solid Fabric, Divided Leg w/Headrest	Medium/Purple
R101	Solid Fabric, Divided Leg w/Headrest	Large/Green
R102	Solid Fabric, Divided Leg w/Headrest	Extra Large/Blue
R100P	Solid Fabric, Divided Leg w/Headrest	Petite/Navy

TOILETING SLING

The Toiletting Sling offers superb access for quick toileting and hygiene. It is easy to place and remove in a bed or chair situation. The fully padded design supports the back, offers under thigh comfort and allows for removal of clothing. Colour coded positioning straps help align the sling properly on the hanger bar.

Note: This sling requires the patient to have FULL head and neck control. Keep arms on outside of toiletting sling. Place leg sections 3-4" above knee for best positioning.

Model	Fabric & Style	Size/Trim Colour
R121	Solid Fabric, Toileting	Large/Green

SLING POSITIONING (Reclined)

Place fan-folded or rolled sling under patient with grab strap away from skin. Roll patient from side to side, smoothing each half of the sling. Bed rail on opposite side should be raised. Refer to Invacare Sling Owner's Manual for detailed instructions.

Full Body

Divided Leg

SLING POSITIONING (Seated)

For Divided Leg or Toiletting Sling, slide behind seated patient until belt is at waist level or bottom of back section is at the base of the spine. Place leg sections under thighs, smoothing fabric. Attach to hanger bar in one of the three methods: crossed between legs, under both legs or single loop under each leg.

Complete instructions for lift usage and sling procedures are found in the Invacare Operating Manual. Only Invacare slings and accessories should be used on Invacare lifts.

Application: Use only with Reliant Stand Up Lift.
 Models: RPS350-1, RPS350-2

STANDING SLING R130

The R130 and R131 standing slings are for residents who are partially dependent, have at least 60% weight bearing capacity, have head and neck control, are cooperative, can sit up on the edge of the bed (with or without assistance), and are able to bend at the hip, knees and ankles. Use the R130 or R131 standing slings for standing assistance, quick toileting, weight bearing practice and for transferring resident from bed to chair, or chair to bed.

TRANSPORT SLING R134

The R134 and R136 transport slings are for transferring residents with minimal weight-bearing capacity, who have head and neck control, are cooperative, can sit up on the edge of the bed (with or without assistance), and are able to bend at the hips, knees and ankles. Use the R134 and R136 transport sling for transferring resident from bed to chair, chair to car or general in-room transport. Do not raise resident to a full standing position while using the transport sling.

Sling Binding Colors

Note: Sling size and fit can vary significantly depending on patient weight and girth. These are general guidelines. Consult physician before sling selection.

Washing instructions are on each sling label. Washing temperature should not exceed 180°F. Air-dry or dry at low temperatures.

All slings are constructed of polyester/-nylon fabrics which can be used in wet or dry environments.

Sling Sizes

Invacare® Reliant Full-Body Slings with Commode Opening

Invacare® Reliant Toileting Sling with Belt

Invacare® Reliant Divided-Leg Slings with Headrest

Invacare® Reliant Transport Sling

The new Invacare® Premier Series slings balances solutions for any transfer. We say that with confidence because these slings were developed in collaboration with Occupational and Physical therapists. Invacare Premier slings are available in a wide variety of styles and can be adjusted to ensure a comfortable and secure fit for the resident. Clearly labeled slings and easy attachment points make it simple for the caregiver to quickly attach the sling and lift the resident.

Application: For use with Invacare® Reliant 350, 450 and 600 series power lifts, the Invacare® Premier Series Jasmine™ and Roze™ lifts.

Models: ROZE, JASMINE, RHL450-1, RPS350-1, RPS350-2, RPL450-1, RPL450-2, RPL600-1, RPL600-2

UNIVERSAL HIGH SLING PLUS

The Universal High Sling supports the whole body and head in transfers to/from seated or lying position. It offers a comfortable recline for those with limited head, trunk or hip control and allows arms to hang outside the sling.

Compatible with the following lifts
 • Jasmine™ • Reliant™ 450, 600

PRODUCT NUMBER/MATERIAL

SIZE	A	B	C	D	POLYESTER FABRIC
S	54.4"	33.1"	34.7"	13.4"	2485960
M	59.5"	37.4"	36.6"	17.7"	2485961

POSITIONING THE SLING

Application: Use with Divided Leg, Universal, Easy-Fit, Toileting, Dress Toileting High Slings

Divided Leg, Universal High, Easy Fit, Toileting, and Dress Toileting High styles may be used for patients on which sling removal is more difficult. Support ranges from upper back to beneath the thighs. These slings can be positioned with the patient seated or lying flat.

PREMIER SLING FABRICS

Polyester Solid Sling Fabric - Offers low shear and enables easy transfers with minimal friction. The lightweight woven design is breathable and can be left in place for short periods of time.

Spacer Hybrid Poly Net - An optimal solution for long term care applications where a sling cannot be removed for short periods of time. Ideal for use with fully dependant users.

Premier Net Fabric - A woven poly mesh that is ideal for commode and bathing applications. Premier Net Fabric is also suitable for daily transfer applications and is an ideal single solution for partially dependant users.

Yes, you can.®

Inspect sling before each use for wear, tears and loose stitching. Bleached, torn, cut, frayed or broken slings are unsafe and could result in injury. Discard immediately. Do not alter slings. Use only on Invacare lifts.

Warning!

BEFORE using the Patient Lift, READ and UNDERSTAND the Owner's Manual for proper operation and safety procedures.

Use the sling that is recommended by the individual's doctor, nurse or medical attendant. Before lifting, check all sling straps for secure points of attachment on lift device. Do not exceed weight limitation posted on lift. Use only with genuine Invacare Patient Lifts.

Bleached, torn, cut, frayed or broken slings are unsafe and could result in injury. Discard immediately. Do not alter slings. Use only on Invacare lifts.
