

LOCALIZERS

Specific Localization | Specific Communication | Specific for CT

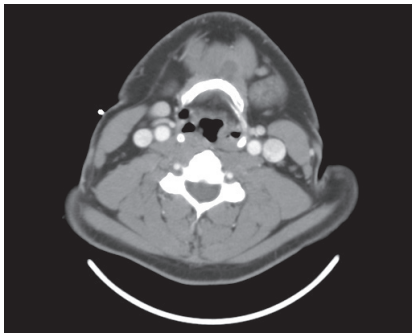

Introducing Localizers:
Artifact Free - Specifically Calibrated for Diagnostic CT

Eliminate rescans caused by skin marker artifact.

- **Specific Localization:** Bright, clear image on scan
- **Specific Communication:** Immediate identification of area of interest for interpreting radiologist
- **Specific for CT:** Unique new formula eliminates noisy artifact

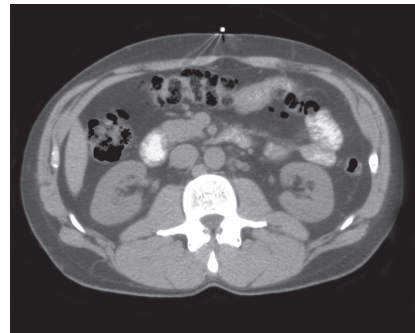

Why rescan because of skin marker artifact? Save time, reduce radiation exposure, and increase patient throughput with Localizers – the first skin markers specifically calibrated for diagnostic CT

Localizers

- Image Brightly
- No Obscuring Artifact
- Clean Image & Communication

Older Marking Methods

- Generate Considerable Artifact
- Can Obscure Areas of Concern
- May Cause Unnecessary Rescans

- Localizer**
order code: 210
