

Nitrile Exam Gloves

Extra strength with a soft touch.

Recommended for use in areas that may involve higher levels of stress on exam gloves (e.g. ER and trauma units), or areas that deal with harsh chemicals or liquid immersion (e.g. lab, oncology, environmental services, edoscopy and pharmacy).

Advanced formula for increased softness and comfort

- **Greater chemical resistance** than both latex and vinyl gloves
- **More affordable than ever before** — our new technology and manufacturing methods make them less expensive to produce, and we pass that savings on to you!

Aloetouch® Ice Nitrile
