

Cytology brushes, Cervical scrapers & OB-GYN Specula

Our cervical scrapers are hand-selected and polished for optimum patient care with a smooth finish. Made from White Birch, these scrapers are durable and useful for a variety of purposes, such as specimen sampling either orally or on the surface of the skin. The 8" OB-GYN applicators are rayon-tipped and configured to facilitate the preparation of the vaginal area for examination. The 16" proctoscopic applicator has a larger surface for optimum preparation of the sampling area. Both 8" and 16" OB-GYN Proctoscopic applicators may be autoclaved for use in a sterile setting and may also substitute as an oral or throat applicator or for topical use. Cytology brushes are designed with gentle bristles for optimum patient care and high cell harvest for Pap Smear testing accuracy.

7" Cervical Scraper

ITEM #	DESCRIPTION	PACK	PACKS PER CASE
