## HIGH FREQUENCY GENERATORS FOR DR, CCD, CR & FILM IMAGING

GENERATOR INTEGRATION, DR

GENERATOR INTEGRATION, CCD

### SHF GENERATORS

The SHF series of generators are available in output ratings of 32 kW to a powerful 80 kW. The generators were designed with safety, reliability and user and patient safety in mind. The SHF generators deliver rapid and accurate access to technique parameters for DR, CCD, CR or film based imaging. Reduction in patient dose, exposure accuracy, efficient operation and extended tube life are synonymous with the SHF series of high frequency generators.

Generator integration to the monitor for digital applications is a unique feature offered with a variety of our DR and CCD digital imaging solutions. Generator integration provides APR view and technique selection and fine tuning of techniques at the workstation for digital imaging.

The SHF generators are not only used with the complete AdvantagePlus system offerings but adapt well as a replacement for older generators in the field including R/F.

Worldwide acceptance of the SHF generators confirms the unsurpassed performance and reliability.

## STANDARD FEATURES SUMMARY

- 8 Anatomical Regions, 8 Views per Region
- Patient Measurement Can be Entered for Automatic Technique Adjustment
- Settings Pre-Programmed for 200, 400 and 800 Speed
- Addition of Customized Views via Laptop
- Generator Integration to Monitor for DR and CCD
- Digital Displays
- Automatic Line Compensation
- Tube Protection
- Self Diagnostics w/ Error Code Reporting
- Table Mount
- Exposure Hand Switch
- Automatic Calibration
- UL/CE/FDA Listed

## OPTION SUMMARY

- AEC (Automatic Exposure Control)
- Various Power Line Operation
- 150 kVp
- Battery Operated, 32, 40 and 50 kW (115 or 220 VAC operation)
- R/F Two Tube
- 640 mAs
- Pedestal
- High Speed Starter
- Touch Screen Control Console
