

Urology Products

The MED-RX® Urology products category is one of the longstanding mainstays of the company. The design and manufacturing expertise developed and refined during the making of our urology products has been one of the catalysts for our growth into other healthcare market segments. The product offerings include a range of sterile intermittent urethral catheters, Cysto and TUR Irrigation Sets and catheterization trays.

Our standard high quality intermittent urethral catheters are available in 16" length in 8fr, 10fr, 12fr, 14fr, 16fr and 18fr sizes and feature closed atraumatic tips with smooth eyes. They are available in either clear PVC plastic with connector or opaque red PVC plastic without connector. Also available are 9" female/pediatric catheters without connector in 8fr and 10fr sizes and 6" length female catheters without connector in 12fr and 14fr sizes.

Our MED-RX® Robinson Plus premium catheters feature specialized low-friction coatings and polished eyes that help improve clinical outcomes and patient comfort. They are available in 16" length in 8fr, 10fr, 12fr, 14fr, 16fr and 18fr sizes.

Please see our Procedure / Patient Care Trays pages for details about our Foley catheterization, intermittent catheterization and irrigation trays.
