

KIMBERLY-CLARK* ULTRA AND MICROCOOL* Surgical Gowns

Introducing a new technology that helps surgical gloves stay in place.

New SECURE-FIT* Technology on KIMBERLY-CLARK* Surgical Gowns.

Have you ever been concerned about cross-contamination during surgery due to glove slip-down—or even had to stop a procedure, re-scrub and re-gown because of it? Then you know what a relief it would be to have your gloves stay securely in place. Well, that relief has arrived.

Kimberly-Clark is proud to introduce a breakthrough in healthcare protection technology. Our ULTRA Non-Reinforced Surgical Gowns and MICROCOOL* Surgical Gowns now feature SECURE-FIT*—a unique, proprietary technology, shown to reduce the amount of surgical glove slipdown when used with market leading surgical gloves. You can see the SECURE-FIT* coating on the forearm of each sleeve, keeping your gloves in place and keeping you confident that both you and your patient are protected.

When you think Kimberly-Clark gowns with SECURE-FIT* Technology, think MICROCOOL* and ULTRA.

Now you can enjoy the peace of mind that comes with SECURE-FIT* technology on a new line of ULTRA and MICROCOOL* Surgical Gowns without changing your current practice of surgical glove donning.

You have a lot of things to worry about during a procedure; pulling up your surgical gloves shouldn't be one of them. SECURE-FIT* technology on MICROCOOL* and ULTRA Non-Reinforced Surgical Gowns is just one more reason to depend on Kimberly-Clark, for trusted clinical solutions that help keep you and your patients safe—and help keep your focus where it belongs.

The KIMBERLY-CLARK* Surgical Gowns with SECURE-FIT* technology are just some of the clinical solutions that you can depend on to meet the demands of your fast-paced world.

Whether your needs involve preventing healthcare-associated infections, surgical and digestive solutions or pain management, with Kimberly-Clark you'll always have one less worry.
